# 3SE, United kingdom QAG.577.rev1.05102022

# **RESICHEM 577 Chem Screed**

- High strength and hard wearing
- Ideal for chemical process areas

## **Cure Times**

At 20°C (68F°) the product will have the following cure times

Usable life 25 minutes 6 hours Hard Drv Minimum over coating 6 hours Maximum over coating 24 hours Foot Traffic 24 hours Forklift traffic 48 hours

## **Coverage Rates**

30kg/ 13.9ltrs (3.68 US gallon) of fully mixed product will give the following coverage rates -

- 2.78m<sup>2</sup> at 5mm. 30ft<sup>2</sup> at 0.20"
- 1.39m<sup>2</sup> at 10mm, 14.95ft<sup>2</sup> at 0.4"
- 0.695m<sup>2</sup> at 20mm, 7.48ft<sup>2</sup> at 0.75"

### Colour

Mixed material -Dark grey and red Activator component -Amber Base component -Dark grey and red

# **Typical Applications**

Ideal for coating concrete floors, problematic cementitious surfaces in industrial warehouses and manufacturing, offices and laboratories.

# **Technical specifications and characteristics**

Mixing Ratio

4.7:1 By weight:

Density

Base: 1.41

Activator: 1.02

Aggregate: 2.7 Mixed: 2.16

Solids content

100%

# **Surface Preparation**

**Existing Concrete** 

- 1. If the concrete surface is contaminated, pressure wash using clean water.
- 2. Once the concrete is drv. lightly abrasive blast or scarify taking care not to expose the aggregate.

#### **New Concrete**

- 1. Allow new concrete to cure for a minimum of 21 days and treat to remove any surface laitance.
- 2. Check the moisture content of the concrete prior to coating (8% moisture content or below).
- 3. Lightly scarify the surface taking care not to expose the aggregate.

All surfaces should be primed with Resichem 577 Chem screed primer.

# **Over-coating times**

Minimum -

6 hours

(or as soon as can accept foot traffic)

24 hours with itself. Maximum -

# **Mixing and Application**

#### STEP 1

Ensure all surfaces are correctly Primed with Resichem 577 Chem Screed primer.

Ensure you have 1 x agg unit, 1 x activator unit, 1 x base unit, metal Trowels, a high powered screed paddle mixer or a forced action rotary mixer.

#### STEP 3

Pour the contents of the base and Activator components into the mixing Tub. Mix together until streak free.

#### STEP 3

Pour the contents of the aggregate Bag into the container and Mechanically mix until homogenous And uniform in colour

#### STEP 4

Pour onto the surface and smooth With a metal trowel. A screed box Or wooden lats can be used to aid Thickness control.

#### STEP 5

Smooth the finish as required using Water or solvent to keep tools from Sticking to the mortar.
